

CLEVER MIRAGE

.410 LOADS

FOR FIELD AND CLAY SHOOTING

19,5 gr.

From Italy with red Fiocchi 65mm and 76mm plastic cases the Mirage .410 loads cover a lot of ground. Loaded with slow burning European double-based ball powder and plastic wads these shells will do all that is required in a .410 cartridge.

Excellent velocity and medium pressures mean that the 11/16oz (19.5gram) Magnum load makes both an excellent field load with Italian #5 (2.9mm, 201 pellets to the ounce) & #7.5 shot (2.4mm) and a devastating clay load with Italian #9 shot

(Equivalent to UK #8.5, 2.1mm/530 pellets to the ounce), with a 4% antimony content, finished with a crimp closure for better and more consistent patterns.

Cal. 36

The 1/2oz(14gram) load is ideal for NSSA Skeet shooting or vermin control with 3% antimony content shot again in Italian #5, #7.5 & #9. Loaded with a plastic half-length cup wad and a crimp closure for ultimate Skeet (#9 shot) patterns with good central core densities and peripheral spread characteristics with greatly reduced barrel leading.
